

Product Data Sheet

Uni-Kote™ Int/Ext Gloss Latex - P700 Series

Product Description

This 100% acrylic high gloss waterborne enamel provides good interior and exterior durability, gloss and tint retention, block and print resistance, ease of stain removal and resists yellowing with excellent adhesion to repainted surfaces including aged alkyls.

Where to Use

This product is typically used on surfaces such as cabinets, doors, walls, and trim for residential and commercial buildings, and schools.

Product Characteristics

Color #P700 - White, #P701 - Black and Custom Colors

Gloss High Gloss

Architectural and Industrial Maintenance Category Non-Flat Coatings

<u>Drying Time</u>	<u>Temperature</u>	<u>To Touch</u>	<u>To Recoat</u>
	75°F / 55% R.H.	2 Hours	4 Hours

(Cooler temperatures, higher humidity will require a longer dry time)

Preparation & Priming

Surface Preparation Paint only over clean and dry surfaces. Remove all loose paint, oil, grease, dirt, chalk or other contaminants that would hinder the performance of the coating. Mildew must be killed by scrubbing with a solution of a non-soapy detergent such as T.S.P. (Tri-Sodium Phosphate), a 10% solution of household bleach and warm water. Thoroughly rinse affected area and let dry prior to painting. Repair all damaged areas and repair any cracks or splits with appropriate caulk or filler. Glossy surfaces should be sanded. On unfinished porous surfaces such as concrete block, a block filler should be used prior to priming.

Primer Coats Normally, prime with Anchor #3601 Exterior Latex Primer and #P1507 Undercoater for interior purposes. Consult your Anchor representative for specific job recommendations.

Mixing & Application

Mixing Stir thoroughly, making sure no pigment remains on the bottom of the can.

Thinning Thin with water only if necessary up to one pint per gallon

Surface Temperature Minimum 50°F, Maximum 110°F - The surface should be dry and the relative humidity should be less than 85%.

Recommended Thickness 1.6-2.0 mils dry per coat. Two coats recommended.

Theoretical Coverage 520 ft²/gal at 1 mil dry, assuming no application losses. Coverage will vary depending on the color, surface texture and application technique.

<u>Coverage Rates per Coat</u>	<u>#</u>	<u>Dry Mils</u>	<u>Wet Mils</u>	<u>Ft²/gal</u>
	<u>Suggested</u>	1.8	5.5	289
	<u>Minimum</u>	1.6	4.9	325
	<u>Maximum</u>	2.0	6.1	260

Application Equipment Airless Spray Pressure 1800-2400 psi
Tip 0.015"-0.017"

Conventional Spray Air Pressure 40-70 psi
Fluid Pressure 10-20 psi

Roller Use 1/4" nap synthetic covers.

Brush Use high quality synthetic or nylon bristle brushes.

Application Considerations Brush, Spray or roll. Strain material before spraying; backroll after spraying. Check color prior to applying as Anchor cannot be responsible for color dissatisfaction after application. Always apply into rather than away from wet edge, overlapping each pass 50%. Avoid touching up, rolling or brushing back into paint more than ten minutes after applying. Touch up when paint is completely dry. Allow to cure ten days before cleaning newly painted surfaces.

Mixing & Application Continued

Touch-Up Proper touch-up is accomplished by applying a thin coat of this product over a well coated surface using the same method of application as used to apply the finish coat, that is, spray over spray, roller over roller. If the finish coat is sprayed, it is also possible to spray a small amount into an empty container, then touching up with a foam brush. Touch up should be done within 5°F of the original temperature.

Technical Information

<u>Solids by Volume</u>	32.46% – Varies by Color		
<u>AIM Category VOC Limit</u>	3.2 lb/gal (380g/l)		
<u>Coating VOC</u>	1.61 lb/gal (193 g/l) – Minus Water and Exempt Materials – Varies by Color		
<u>Material VOC</u>	0.65 lb/gal (78 g/l) – Varies by Color		
<u>Density</u>	10.15 lb/gal (1216 g/l) – Varies by Color		
<u>Packaging</u>	5 Gallon pails, 1 Gallon cans, and quart (1/4 gallon) cans		
<u>Chemical Resistance</u>	<u>Flexibility:</u>	Excellent	<u>Weather:</u> Excellent
			<u>Abrasion:</u> Excellent
<u>Heat Resistance</u>	120-150°F Continuous		

Clean-up & Storage

<u>Cleanup</u>	Use soap and water	
<u>Storage Temperature</u>	Minimum 35°F	Maximum 110°F
<u>Shelf Life</u>	Under Normal Conditions (Unopened) – Two Years	

Safety & Important Information

WARNING! OVEREXPOSURE MAY CAUSE KIDNEY DAMAGE. CONTAINS: PROPYLENE GLYCOL. Causes eye irritation. NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

Use only with adequate ventilation. Avoid breathing vapors or spray mist. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates vapor/mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes. Wash thoroughly after handling. **KEEP OUT OF REACH OF CHILDREN.**

WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead. WARNING! Sanding or scraping pressure treated lumber may be hazardous; wear appropriate protection.
